Science for Humanitarian Emergencies and Resilience (SHEAR)

Caribbean Consultation

Alex Harvey
Climate Change and Disaster Risk Reduction Team Leader, DFID

Dr Nicola Ranger
Research and Evidence Division, DFID
Science for Humanitarian Emergencies and Resilience

2nd ‘Priority for Action’ of the Hyogo Framework for Action:
“Identify, assess and monitor disaster risks and enhance early warning”

The goal of this workshop is to:

1. Seek a broad range of views on the need, knowledge gaps and research priorities to enhance the use of disaster risk assessment and early warning systems in the Caribbean

2. Gain feedback on initial plans for a new DFID-funded research programme “Science for Humanitarian Emergencies and Resilience”
<table>
<thead>
<tr>
<th>Systemic, open risk information and analytical tools</th>
<th>State-of-the-art integrated early warning systems</th>
<th>Evidence-based tools and methods to integrate science into decision making</th>
</tr>
</thead>
<tbody>
<tr>
<td>Open risk atlas, underpinned by high quality research</td>
<td>Greater understanding of social, political, economic and ecological drivers of risk</td>
<td>Pilot application of innovative warning systems with rigorous Monitoring and Evaluation</td>
</tr>
<tr>
<td>Hierarchy of multi-hazard, dynamic risk models tailored for application</td>
<td>Integrated warning systems for disaster preparedness and response</td>
<td>Better understanding socio-political barriers to uptake and lessons on overcoming them</td>
</tr>
<tr>
<td>New sources of information on hazard, vulnerability, exposure and loss</td>
<td>Rigorous evaluations of warning systems from a user perspective</td>
<td>Enhanced understanding of risk communication to inform methods and tools</td>
</tr>
</tbody>
</table>

Strong focus on evaluating what works in practice

Tried and tested open data/model platform accessible to all

Targeted capacity development
Structure of the session

This session will include:

1. Introduction to the initial findings from the SHEAR scoping study

2. There will be three break-out sessions to discuss and get the views of relevant stakeholders in the region concerning:
   (i) Current initiatives for risk assessments and early warning systems for weather-related hazards
   (ii) The major gaps where new research is needed
   (iii) How can research initiatives best meet end-user needs
